

# Custom Engineering Services

## Engineered Solutions

Our Engineering division is dedicated to providing excellence in Technical solutions.

**Progressive Machinery** can provide you with an objective evaluation of your requirements and present you with cost-effective options. Our solutions are designed to:

1. Improve Productivity
2. Consistent Process Control
3. Increased Product Quality
4. Reduced Downtime
5. Reduced Maintenance Cost

## Commissioning and Start-up Assistance

Proper start-up of any system is necessary to ensure optimum performance. **Progressive Machinery** provides technical guidance and/or technical supervision of on-site activities during start-up to complement your own participation and involvement.

## Systems Integration and Automation

A complete range of systems design services are available for electrical control packages, including:

- Custom Engineered Systems
- Upgrading of Existing Systems
- MMI Designs
- Programmable Logic Control
- Data Collection and Recipe Packages

**Progressive Machinery** can also provide system assemblies completely wired and interconnected per a customer's specific design requirements. All components are mounted and wired to meet all applicable industry standards.

## Application Software

High quality and cost effective software design services are available for most PLC and MMI, including:

- PLC Programming
- Operator Interface Configuration
- Communication Drivers
